

Saiosh OHS - CPD
Port Elizabeth

Friday 5th October 2018

It is always a pleasure to share knowledge, this once again the scenario where Accident Specialist was asked to provide the key note lectures to the series of five workshops as part of the Saiosh Continuous Professional Development (CPD) sessions being undertaken nationally to their members. This session in Port Elizabeth, forming the first one as part thereof.

With exceptional weather on the day, the session held at a great hotel venue on the main beachfront, saw approximately 65 attendees with a responsive and keenly interactive group making for a great session.

Saiosh also facilitating product specialist in the field of Personal Protection Equipment (PPE) from UVEX and Dromex, to highlight their products and services, served as a great reminder of the critical importance of PPE and the availability of world class products and knowledge. The session also providing Saiosh with the platform to make direct contact with many of its members in the region and to pass on Association information to its members first hand.

As usual, the provided pre and post session tea, coffee and snacks, provided for the opportunity to network and discuss the days topics or current issues.

Statistically, incidents of transport and machinery related deaths, injuries, vehicle or machinery and property damage, or even just delays; of major concern. Accident Specialist provided a direct and indirect linking of the requirements of the Health and Safety Act, to that of requirements of investigating incidents. A

range of interesting real world case studies presented, highlighting the basics of process from start through to finish.

There is no doubt that the effort being put in by the key management of Saiosh sees great value and return to the members of the Association, to which Accident Specialist conforms as a corporate member of the Association. The overall number of members of the Association and likewise the number of attendees that regularly attend sessions speaks volumes of the efforts and value add to the members, not only through such sessions, but through other benefits to the members.

The sponsors are key to the ability of Saiosh to facilitate such sessions and likewise the overall benefits to the members, to them, hats-off. Accident Specialist too, is proud to be associated to Saiosh as a key contributor.

We look forward to the next session in Cape Town on the 12th October and hope to see a keenly attended and interactive session.
